## **DETAILED ACTION**

## Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1, 6, 9 and 10 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by US 5,681,634.

The reference disclose an optical recording medium comprising two substrates adhered together with a UV curable resin material where the UV curable resin material may be formed of two different resins having different viscosities. The resin having the higher viscosity is applied to the medium on the inner periphery thereof while the resin having a lower viscosity is applied on the outer periphery. See Example 6 and claim 33.

Claim Rejections - 35 USC § 103

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

Claims 2-5 and 7-8 are rejected under 35 U.S.C. 103(a) as being unpatentable over US 5,681,634.

Application/Control Number: 10/743,552 Page 3

Art Unit: 1774

The reference discloses the optical recording medium as described above. It is recognized

that the reference is silent as to the specific viscosity values of the UV curable resin materials.

However, the reference does disclose resins having "high" and "low" viscosities. It would have

been obvious to one of ordinary skill in the art to modifying the viscosity values to improve the

application of the resins, such as by spin coating. One would be motivated by the reasoned

expectation of obtaining an easier method of application.

Any inquiry concerning this communication should be directed to Elizabeth Evans Mulvaney at

(571) 272-1527. The examiner can normally be reached Monday through Thursday from 9:00 AM

to 6:00 PM and on alternating Fridays from 9:00 AM to 5:00 PM.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Rena

Dye, can be reached at (571) 272-3186. The fax number for the organization where the application

is assigned is 703-872-9306. Information regarding the status of an application may be obtained

from the Patent Application Information retrieval (PAIR) System. Status information for published

applications may be obtained from either Private PAIR or Public PAIR. Status information for

unpublished applications is available through Private PAIR only. For more information about the

PAIR System, see <a href="http://pair-direct.uspto.gov">http://pair-direct.uspto.gov</a>. Should you have questions on access to the Private

PAIR System, contact the Electronic Business Center (EBC) at 866-217-9197 (toll free).
